

The effect of migrant social investment on crime: **a local radiography of the program 3x1.**

Does the social investment through the 3x1 program has any effect on the crime rate?

What is 3x1?

The Program 3x1 supports Mexicans living abroad to **develop social infrastructure** and productive projects in their hometown communities.

For **each dollar invested by the immigrant**, the federal government, the state and counties invest other 3 dollars.

Why crime?

Our hypothesis is that there should be a positive effect on the reduction of crime due to the productive projects financed by 3x1.
